jewel-like washbasins.

One notable example of the use of new materials is the Corten steel shelf produced by **Galassia**, part of the new **Dream** collection designed by Antonio Pascale with a unique "total look". The **Ceraslide** enamel developed by **Globo** is another outstanding innovation. Its new formulation ensures outstanding durability and hygiene as the enamel reduces the porosity of the ceramic surface and ensures greater resistance to staining, dirt and abrasion.

Home renovation continues to be a very important market segment and requires products that are flexible and easy to install and fit in well with existing furnishings. **Hatria** in particular is unveiling a wide range of new products at Cersaie - from Pure Rimless WCs to the Pure Fix invisible mounting systems for back-to-wall WCs and bidets - as well as a unique **Le Fiabe open bidet** with a large rear opening that covers up the fittings on old freestanding bidets without the need to perform building work.

## PRODUCTS GALLERY

The entire Fall/Winter 2015-2016 collection of Italian ceramics can be seen online at:
